DETAILED ACTION

EXAMINER'S AMENDMENT

1. In view of allowable subject matter, the Applicant's representative was contacted.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Corwin P. Umbach on September 28, 2005.

The application has been amended as follows:

Claims 1, 2, 14 and 15 have been cancelled.

Allowable Subject Matter

2. Claims 3 – 13 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 3 – 6, 12 and 13 recite, inter alia, a method of forming a conductive film, comprising coating a substrate with a composition comprising a complex of an amine compound and a hydrogenated aluminum compound and a titanium compound and then subjecting the obtained coating film to heating and/or a light treatment to form a conductive film. Although, Sheel, US 5,861,189 and Sugai, US 5,793,479 teach methods of forming a conductive film by coating a substrate with a composition that is a complex of an amine compound and a hydrogenated aluminum compound, they fail to teach mixing a titanium compound in that composition. Additionally, The art of record

Art Unit: 2891

does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 7 –13 recite, inter alia, a method of forming a conductive film, comprising coating a substrate with a composition comprising a complex of an amine compound and a hydrogenated aluminum compound and metal particles and then subjecting the obtained coating film to heating and/or a light treatment to form a conductive film. Although, Sheel, US 5,861,189 and Sugai, US 5,793,479 teach methods of forming a conductive film by coating a substrate with a composition that is a complex of an amine compound and a hydrogenated aluminum compound, they fail to teach mixing metal particles in that composition. Additionally, The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asok K. Sarkar whose telephone number is 571 272 1970. The examiner can normally be reached on Monday - Friday (8 AM- 5 PM).
